# "We combine the world of virtual reality and healthcare"

## About VReduMED

### Virtual Reality Education and Training Solutions for Medicine Sector

VReduMED is a pioneering project under the Interreg CENTRAL EUROPE program to enhance the training of care education professionals by exploring cutting-edge virtual reality teaching methods.

Medical interventions are increasingly digitalized, while the training of healthcare staff is still lagging behind. The VReduMED project helps to untap the potential of virtual and augmented reality for their education.

One of the central activities of the project is the establishment of three regional virtual reality labs (one each in the Czech Republic, Hungary and Germany), where different use cases can be tested.

# VR Lab in Czechia

**Offer** | Visit the laboratory and test the scenarios

**Target groups** | Schools, individual students, companies interested in VR technology

**Available scenarios** |

- CPR (Cardiopulmonary Resuscitation) training,
- ICU (Intensive Care Unit) tutorial,
- relaxing app for elderly homes,
- EduPack (VR classroom)
- VReduMED apps, interactive models of machinery

**Available VR glasses** | Meta Quest 2, Meta Quest 1

JVTP a.s.  
Lipová 1789/9  
370 05 České Budějovice

# VR Lab in Hungary

**Offer** | Visit the laboratory and test the scenarios

**Target groups** | Own students and students from partner institutions; others from the partnership

**Available scenarios** |

- Selection of best practices
- Room of Horror (find nursing errors)
- CPR (cardiopulmonary resuscitation) of a child

**Available VR glasses** | Meta Quest 3 and Meta Quest 2

Széchenyi István University,
